

# Animal Waste Management Plan Assistance

## What can Cape Atlantic Offer?

The Cape Atlantic Conservation District has partnered with the NJ Department of Agriculture to be able to offer both technical and financial assistance to farmers. This assistance will help you maintain compliance with state law, improve environmental concerns and help with overall farm management.

## Financial Assistance Available!

Funding is available to help farmers implement best management practices used to improve animal waste management. Best management practices will be tailored to each farm but may include practices such as exclusionary fencing, filter strips, and pasture management.

We will write or update your farm's animal waste management plan  
**AT NO COST TO YOU!**

## Who needs an Animal Waste Management Plan?

Animal Waste Management Plans are required by state law for any farms with more than 8 animal units (8,000lbs) of live animals. These plans lay out how manures will be handled to limit the environmental degradation they can cause.
